

RAG End-to-End Test Knowledge Document

SECTION 1 — COMPANY INFORMATION

Attribute	Details
Company Name	NovaTech Manufacturing Pvt. Ltd.
Industry	Industrial Manufacturing
Headquarters	Indore, Madhya Pradesh, India
Founded	2018
Employees	245

SECTION 2 — INDUSTRIAL EQUIPMENT

Parameter	Compressor C-101 Data
Equipment ID	COMP-C101
Equipment Name	Compressor C-101
Location	Production Unit A
Manufacturer	Atlas Industrial Systems
Installation Year	2022
Current Temperature	92°C
Normal Temperature Range	65°C–80°C
Current Vibration	8.5 mm/s
Normal Vibration Range	2.0–4.0 mm/s
Current Status	CRITICAL
Required Action	Immediate maintenance inspection is required.
Maintenance Priority	URGENT
Last Maintenance Date	15 August 2026
Next Scheduled Maintenance	15 September 2026

SECTION 3 — SECOND EQUIPMENT

Parameter	Cooling Pump P-204 Data
Equipment ID	PUMP-P204
Equipment Name	Cooling Pump P-204
Location	Production Unit B
Current Temperature	61°C
Current Vibration	3.2 mm/s
Current Status	NORMAL
Required Action	No immediate maintenance action is required.

SECTION 4 — SAFETY POLICY

Policy Name: Industrial Equipment Safety Policy

Policy ID: NTM-SAFE-2026

- **Rule 1:** Any equipment with a temperature above 90°C must be inspected by a qualified maintenance engineer.
- **Rule 2:** Any equipment with vibration above 7.0 mm/s must be classified as requiring urgent inspection.
- **Rule 3:** Equipment classified as CRITICAL must not continue normal operation without maintenance approval.

SECTION 5 — MAINTENANCE CONTACT

Role / Department	Contact Information
Maintenance Department	NovaTech Industrial Maintenance Team
Maintenance Manager	Rahul Sharma
Emergency Extension	4521

SECTION 6 — TEST FACTS

The following facts are intentionally included for RAG testing:

Fact A: Compressor C-101 has a temperature of 92°C.

Fact B: Compressor C-101 has a vibration level of 8.5 mm/s.

Fact C: Compressor C-101 is classified as CRITICAL.

Fact D: Immediate maintenance inspection is required for Compressor C-101.

Fact E: Cooling Pump P-204 has a NORMAL status.

Fact F: Equipment above 90°C requires inspection by a qualified maintenance engineer.

Fact G: Equipment with vibration above 7.0 mm/s requires urgent inspection.

Fact H: The maintenance manager is Rahul Sharma.

Fact I: The emergency maintenance extension is 4521.
