PROFESSIONAL SUMMARY

AI Engineer specializing in Generative AI, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), and AI Agent development. Experienced in building AI-powered applications using Python, FastAPI, LangChain, LangGraph, vector databases, and modern LLM APIs. Skilled in developing intelligent workflows, automation systems, chatbots, and production-ready AI applications with scalable backend architectures.

Passionate about Agentic AI, autonomous systems, AI SaaS products, and solving real-world problems through artificial intelligence.

TECHNICAL SKILLS

Programming Languages

- Python
- JavaScript
- SQL
- Java (DSA Fundamentals)

Artificial Intelligence

- Generative AI
- Large Language Models (LLMs)
- Prompt Engineering
- AI Agents
- Agentic Workflows
- Retrieval-Augmented Generation (RAG)
- Embeddings

- Vector Search
- AI Automation
- Multimodal AI

AI Frameworks & Libraries

- LangChain
- LangGraph
- LlamaIndex
- OpenAI API
- Google Gemini API
- Hugging Face Transformers
- PyTorch
- TensorFlow
- Scikit-learn
- Pandas
- NumPy

Backend Development

- FastAPI
- Flask
- REST APIs
- Authentication
- JWT
- WebSockets
- Pydantic

Databases

- PostgreSQL
- MySQL
- SQLite
- MongoDB
- Supabase

Vector Databases

- ChromaDB
- Pinecone

DevOps & Tools

- Git
- GitHub
- Docker
- CI/CD
- Vercel
- Streamlit

Frontend

- HTML
- CSS
- JavaScript
- React.js
- Next.js
- Tailwind CSS

PROJECT EXPERIENCE

Genius AI — Agentic AI Assistant

Generative AI | RAG | LLM Application

- Developed an AI-powered assistant capable of answering user queries using Large Language Models.
- Integrated LLM APIs for intelligent text generation, conversational responses, and AI workflows.
- Implemented Retrieval-Augmented Generation (RAG) architecture for knowledge-based responses.
- Added multimedia AI capabilities including voice interaction and intelligent content generation.
- Built and deployed the application using modern web technologies.

Technologies:

Python, LLM APIs, RAG, LangChain, Vector Database, React, Vercel

GramSetu — AI-Powered Rural Coordination Platform

Hackathon Project | AI Application

- Built an AI-powered platform connecting rural service providers and farmers.

- Designed intelligent grouping and recommendation workflows for optimizing resources.
- Implemented AI-based matching logic for tractors, transportation, mechanics, and agricultural services.
- Developed multilingual user experience supporting Hindi and English.
- Created scalable frontend architecture with modern UI animations.

Technologies:

React, Next.js, AI APIs, Three.js, Tailwind CSS, Database Systems

MCQ Generator GenAI Application

Document Intelligence | Generative AI

- Developed an AI application that generates multiple-choice questions from uploaded documents.
- Integrated PDF processing pipelines for extracting and analyzing document content.
- Implemented LLM-based question generation workflows.
- Built an interactive Streamlit interface for users.

Technologies:

Python, Streamlit, LangChain, PDF Processing, Generative AI

AI Research Assistant (Personal Project)

- Designed an AI assistant capable of retrieving information and generating structured responses.
- Implemented document retrieval and semantic search workflows.
- Used embeddings and vector storage for knowledge retrieval.
- Created modular AI pipelines for future agent-based expansion.

Technologies:

Python, RAG, Embeddings, Vector Database, LLM APIs

EXPERIENCE

PATREX Media — Founder / AI & Web Solutions Developer

- Built AI-powered digital solutions combining web development and automation.
- Developed websites, AI tools, and intelligent business solutions.

- Worked on UI/UX design, frontend development, and AI integration.
 - Managed project planning, deployment, and client-focused solutions.
-

EDUCATION

Bachelor of Technology (B.Tech)

Oriental College of Technology, Bhopal

Expected Graduation: 2028

CERTIFICATIONS & LEARNING

- Generative AI and Large Language Models
 - Machine Learning Fundamentals
 - Python Programming
 - FastAPI Backend Development
 - AI Agent Development
 - Retrieval-Augmented Generation (RAG)
-

GITHUB HIGHLIGHTS

- Built multiple AI-powered applications using modern LLM technologies.
 - Developed backend APIs and deployed production-ready applications.
 - Created open-source projects focused on AI automation and real-world problem solving.
-

SOFT SKILLS

- Problem Solving
 - System Thinking
 - Research Ability
 - Fast Learning
 - Communication
 - Product Development Mindset
-

TARGET ROLES

- AI Engineer
- Generative AI Engineer

- Agentic AI Engineer
- Machine Learning Engineer
- AI Application Engineer
- LLM Engineer
- AI Solutions Engineer
